We assemble the best components to make the most beautiful outdoor lights in the world. Each component is carefully selected to assure reliable performance. Outdoor lights from Solarpowergetics are designed to operate for many years with low maintenance. Solar-powered outdoor lights require direct sunlight.

Courtyard lights provide bright illumination and safety for parks, small streets, driveways, landscapes and home gardens.

A standard model is designed to operate independently for up to five days based on location. Our self-contained models are made-to-order at reasonable prices.

Purchase factory-direct from Solarpowergetics. Our best selling models are displayed at Getics Power Stations in Los Angeles (opening 2008) and Hong Kong (opening 2009).

Benefits of Solar Outdoor Light

- Sophisticated Sun Powered Technology.
- Complete elimination of ugly power lines and utility costs.
- Hedge against rising utility rates. Compute a 10-yr. cost analysis.
- Reduction of installation costs. No trenching!
- Life expectancy of over ten years.

How to Get Started

1. Review everything on this page.
2. Review Store Policies and current price at www.solarpowergetics.com before purchase. All sales are final.
3. If available, download Product Specification Sheet.

4. Get basic information about renewable energy at www.solarpowergetics.info.
5. Direct sunlight is required.
6. Height and distance between each light are important considerations.
7. This product has limited lighting applications.
8. Luminance, intensity and efficacy of light should be understood.
9. Select the type of light that best serves the purpose and location.

Before Purchase:

Consult with a licensed contractor and certified solar installer in your area regarding foundation and installation. Licensed contractors and certified solar installers are encouraged to contact us by [email](#) to get started.

For system applications and site configurations, contact us for a list of reputable consultants for large projects.

Outdoor lighting systems, when properly installed and maintained, must match standards by set forth by federal, state and local entities. If applicable, peruse eligibility lists for rebates and incentives at the federal, state and local level also.
